

General Rules v3 – Updated 6/3/2012 3:30pm

Welcome to Euro 2012 Football Pool. The format for this tournament should test your football knowledge and maybe your luck as well. You may enter as many times as you like selecting the following items:

- All Game results (scores)
- Select the group standings after the first round and then place them in the table to score each successive game.
- Total Goals (Tie Breaker) will be automatically calculated for you based on your input.

Entry fee for the Tournament will be \$20.00

For each correct selection, you'll receive various points. The points from all the games will be totaled and then a point adjustment will be made from the difference between your total goal calculation and the actual total goals for the tournament. If the total goals are 105 and you've calculated 100, a 5 point adjustment will be made. It makes no difference if you are above or below the total goal amount the difference will be subtracted from your score.

In the case of a tie, the person with the closest number of goals shall be declared the winner. If this number results in an additional tie, the monies representing the pool places shall be split evenly. For example, if players 1 and 2 each are tied for first place and have both guessed the same number of goals, monies for 1st place and 2nd place shall be combined and distributed 50 / 50 between the two players.

Your total points for the tournament will be compared to the rest of the entries and the top 5 point results will be paid based on a percentage of the total monies collected.

First Round Games Results

In the first round, there are 24 games. Choose the score of each game. If you've chosen the correct Winner/Loser or Draw, you will receive 5 points. If the score you've entered matches exactly, you'll receive an additional 5 points.

First Round Standings

At the end of the 1st round, place each team in the order (1-4) you think they will finish in the group (A-D) stages. For each correct answer, you will receive 5 points. If you select the group in the exact order, you will receive an additional 5 points.

Quarter Finals, Semi Finals and Final Rounds

After placing the top two teams from each group in the right boxes, A1-B2, B1-A2 etc, enter the score for each successive game. Pay attention to the groupings to come up with the proper teams and subsequently the results. It is not necessary to select both teams properly if you've chosen the proper winner of that game. Selecting the correct winning team results in the following points:

10 Points - Quarter Final Winners (4)

20 Points – Semi Final Winners (2)

30 Points - Winner

Total Goals

The total number of goals by all teams throughout the tournament will be calculated automatically based on your individual game entries. Games ending on Penalty Kicks regardless of score will be counted as a +1 goal win for the winning side regardless of the number of penalties.
